

Ammunition found near Beira airport ..(Text) Hundreds of rounds of ammunition, together with automatic arms, rifle magazines and bags containing explosive charges, have been found on the premises of Beira international airport as a result of investigations into activities against the security of the Mozambican state. Our radio station [regional] in Beira has cited a source in the security services as having said that they were looking for the person responsible for this criminal act. The same source disclosed that there had been attempts by people accused of involvement in acts of sabotage and by others who had carried out attempts against the Mozambican state to deny any knowledge of such acts lest they compromise themselves.
