**MAPUTO --** A large amount of ammunition and explosives has been found dumped in bushes near Beira's international airport, according to the official Mozambican news agency, AIM.

The discovery follows the arrests of six foreigners -- one Briton and five Portuguese -- on suspicion of complicity in acts of sabotage, AIM said today. They have not yet been charged.

The arrests in Beira followed the destruction of a large part of the city's fuel storage depot by the anti-Frelimo Mozambique National resistance.
