

More murders and destruction on the periphery of Maputo

M10 News Rev. 29/9/85

MNR bandits murdered four people and wounded five others in incursions into Matola and Machava on the outskirts of Maputo at about midnight on 22 September.

Observers in Maputo believe that recent acts of banditry on the periphery of the city are designed to cause an impact internationally, and also to draw Mozambican troops away from other parts of Maputo province where they are pursuing a successful offensive against major MNR concentrations.
