[Text] The EEC and the Italian Government are to finance the development of fishing infrastructures in Nampula, Sofala, and Inhambane Provinces with \$40,700,000, or about 18,315,000 contos.

Sources in the EEC and in the Italian Government have told NOTICIAS newspaper that this project aims to develop fishing and research on fishing resources, with the objective of introducing industrial and semi-industrial programs.

The project, expected to last 40 months, provides for the creation of a fishing production and distribution center in Nampula Province and the creation of a center for the processing and preservation of export goods.
