

EC gives \$390 000 to Mozambique for health

WM 10-12/8/90

BRUSSELS: The European Community yesterday granted \$390 000 in emergency aid to help fight epidemics of cholera and malaria in Mozambique.

The money — worth 300 000 European Currency Units — will be used to buy vaccines and pay for their transportation and distribution in Mozambique.

The money will also be used to send medical teams to the southern African nation through a private Italian relief organisation, the EC Executive Commission said in a statement. — Sapa-AP
